

MAX™ EX Expansion Requirements

LINKING MAX EX PHONES

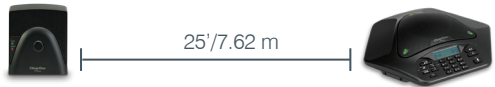

Up to four MAX EX phones can be linked to expand loudspeaker and microphones coverage in larger rooms or U-shaped table configurations. MAX EX can be purchased as a stand-alone unit, which includes the base unit, one phone and a 25' (7.62 m) cable, or as an Expansion Kit, which includes one phone and a 12' (3.66 m) cable.

To ensure optimal performance, use the provided 25' cable to connect the base unit to the first phone and the provided 12' cables to link additional phones. If only two phones are being linked, two 25-foot cables may be used. ClearOne 12' cables can be purchased separately. Please contact ClearOne Sales at 1-800-945-7730 for more information.

For assistance with non-standard configurations, please contact ClearOne Technical Support at 1-800-283-5936 (USA) or 1-801-974-3760.

STANDARD EXPANSION CONFIGURATIONS

Single phone
