

DIGILINX™ Technical Bulletin

Imerge SoundServer S3000 Issues with *DigiLinX*

This technical bulletin addresses the following known issues when using Imerge S3000 with *DigiLinX*.

- When recording music to the SoundServer S3000 or when recorded music is being converted to MP3 files, it may generate system error messages which will affect performance.
- Bulk updates may cause the SoundServer S3000 to produce system errors.

NetStreams is working on a fix to correct these issues and hopes to have it available in the next version of *DigiLinX* Dealer Setup v2.0.
